

AQ, Automobile Quarterly

Some of the best articles on the history of steam automobiles come from back issues of the Automobile Quarterly, started in 1962. This is a hard cover automobile magazine with full color prints. The articles are very well researched and in many cases they are the only source of information on the subjects to be found. The photos alone make them worth purchasing.

- Volume II, No. 2 Evaporating the Stanley Steamer Myth by Raymond W. Stanley
The Steam Revival by Joseph Lowrey
A Selection of Rare Steam Prints from the Collection of Charles Dollfus
This issue has a good history of the Stanley Company coming from a son and nephew of the founders. The Steam Revival article mentions the work of Sir Alex Moulton in England and the Singer car company. This was from the late 1940's. In 1951 Peter Scott-Brown left Moulton to go to California to work with Doble on the McCulloch Paxton project. It is all good history.
- Volume IV, No. 4 The Forgotten Steam Buggy of Henry Seth Taylor
This is a short article on a steam buggy made in Stanstead, Quebec in 1867
- Volume V, No. 2 Dr. Church's Steam Carriage: 1835
This large three wheeled bus went 14 miles an hour and ran on the roads of that period until the owner was threatened with law suits of causing a nuisance.
- Volume V, No. 3 Richard Dudgeon, Machinist
The Dudgeon vehicle is in the Smithsonian. It was built in 1866 here in the U. S. and ran successfully with large solid wooden wheels.
- Volume VIII, No. 1 The Steam Odyssey of Abner Doble
The Now Generation of Puffers
This issue is one of the best as it has a long article complete with many photos of the Doble history and a long article written in 1969 on the modern steam development of Lear, Williams, Smith and Petersen, Keen, SES, and Besler.
- Volume XXV, No. 1 F. E. & F. O. Stanley: The Challenge From Steam
Stanley Cars: A Color Portfolio
This is an excellent history of the Stanleys and their work with the second article having some of the best color photos of Stanley automobiles.
- Volume 31, No. 4 White Steam: Sewing Up the Steam Car Market
A very good article on the history of the White Steam automobile business.
- Volume 44, No. 3 Marque History: Brooks Steamers
Of Inventors & Inventions, Bill Lear's Great Steam Adventure
The Brooks steamer was made in Canada and many of the people left over after the Stanley company went under worked on the Brooks. This is a good article. The Bill Lear article is well researched and has good photos.

Volume 45, No. 3

Brass Era, Serpollet

Here is the best source of Serpollet history and information.
