The LOCOMOTIVES that BALDWIN built

By Fred Westing

OLD HENRIETTA, the locomotive that started it all. Built by Matthew William Baldwin in 1830. The financial backing that followed its sale almost drove Baldwin away from locomotives, fortunately it didn't. (Collection of Fredrick Westing)

Paddle Wheel Steamers and their GIANT ENGINES

by Bob Whittier
Bob Whittier

An engineer at the starting bar of a walking beam marine engine. These once-common powerplants were unusual in many ways, including the fact that their steam valves were manually operated when starting and reversing. The engineer eased the pendulum mechanism into motion and up to speed by operating the starting bar and using his well-developed feel for the engine, much as a motorist of today shifts gears in a car having manual transmission. Then the engineer "dropped the hook", or engaged the engine's automatic roller-operating mechanism.

The Design of High-Efficiency Turbomachinery and Gas Turbines

David Gordon Wilson

David Gordon Wilson, formerly Principal Engineer, Rolls-Royce Limited, is now Professor of Mechanical Engineering, University of Cambridge. He has been a member of the Advisory Committee for the design of gas turbines for the Royal Air Force, and has been a member of the Advisory Committee for the design of gas turbines for the Royal Navy. He has also been a member of the Advisory Committee for the design of gas turbines for the Royal Canadian Mounted Police. He has been a member of the Advisory Committee for the design of gas turbines for the Royal Canadian Mounted Police. He has also been a member of the Advisory Committee for the design of gas turbines for the Royal Canadian Mounted Police.

MODEL MAKING

INCLUDING
WORKSHOP PRACTICE, DESIGN AND
CONSTRUCTION OF MODELS

A PRACTICAL TREATISE FOR THE AMATEUR AND PROFESSIONAL MECHANIC—GIVING INSTRUCTIONS ON THE VARIOUS PROCESSES AND OPERATIONS INVOLVED IN MODEL MAKING AND THE ACTUAL CONSTRUCTION OF NUMEROUS MODELS, INCLUDING STEAM ENGINES, SPEED BOATS, GUNS, LOCOMOTIVES, CRANES, ETC.

LATHÉ WORK, PATTERN WORK, ELECTROPLATING, SOFT AND HARD SOLDERING, GRINDING, DRILLING, ETC. ARE ALSO INCLUDED

EDITED BY
RAYMOND FRANCIS YATES
EDITOR OF "EVERYDAY ENGINEERING MAGAZINE"

FULLY ILLUSTRATED WITH 300 ENGRAVINGS
REPRODUCTIONS OF ACTUAL WORKING MODELS
